

Adding a new and fresh attraction: 3D Food Printing

# FOODINI IN THEME PARKS

The addition of Foodini creates a fun and fresh attraction, engaging park visitors in a new way.

FOR AMUSEMENT PARKS AND  
THEME PARKS

## INTERACTIVE FOOD AMUSEMENT

Amusement and theme parks aren't just about rides. There are other attractions, like dining, entertainment, shopping and games.

In many parks, guests can already participate in studio music recording booths, create souvenir photos, get face paintings, sit for a portrait or caricature, mix & match unique candy assortments... why not add the interactive, fresh and new attraction of 3D food printing?

Kids (and adults!) can interact with Foodini and create their own 3D printed foods that they can eat and enjoy.

Give park guests the opportunity to treat themselves to a unique food experience.
